Procedure			
1. Mix A completely until uniform.			
2. Add B to A gradually and emulsify with paddle-mixer.			
3. After all B is added, mix well until uniform with paddle-mixer.			
Note			
Initial viscosity(Btype Viscometer No.4 6rpm./30sec.): 56800 mPa·s			
*Adjust the viscosity with mixing speed and mixing time.			

We do not guarantee the preservation property of this formulation as we do have not checked it.
